

Energy Industry Solutions

Today's Challenges

A change is coming to the power industry, a digital shift or movement. Renewables, smart grids and distributed generation, demand new capabilities that can and will trigger new business models and promote regulatory frameworks.

Enterprise Asset Management (EAM), including Maximo, Integration & Support

- Data driven maintenance, prevention & predicted outages
- Monitoring of overall system health
- Parts management

Mobile Solutions - Time Sheet & Project Management

- Simplified scheduling
- Improved, prompt dispatch
- Better tracking of hours worked
- Job closeout and analysis

Collecting data and data exchange are growing exponentially, creating this digital bullying issue, but also creating valuable opportunities.

The struggle for customers is shifting to the online channel. Participants from the digital economy are upsetting the industrial landscape, while governments and regulatory bodies search for ways to encourage more intelligent measuring systems and greener standards for generation and consumption.

Customer Experience/Information & Billing

- Increased customer satisfaction
- Lower service cost/Increased operational efficiencies
- Improved enrollment, billing flexibility & collection accuracy
- Improved outage communications

Smart Metering/Meter Data Management

- Better customer service & reliability
- Encourages & enables greater conservation
- Streamlined operations
- Improved outage management

Let V2Soft help you through the maze of chaos and work with you to help resolve your challenges. Our team of Industry Experts can help with best practices and client experience to help you choose the best solution for your needs. Let's talk!

Supporting Solutions

- Artificial Intelligence & Machine Learning
